HIV/AIDS requires a gender-specific response, and this manual has been prepared in response to this need. It aims to help trainers enhance their understanding of the gender dimensions of HIV/AIDS, and effectively influence change makers in their "spheres of influence" to undertake appropriate responses to the challenges being posed by the epidemic. The manual draws on more than a decade's experience from the field, building on the lessons learned, and analyzes and synthesizes them within the conceptual framework of gender and human rights.
