

## **Zimbabwe remains worst affected by HIV/AIDS**

---

Zimbabwe remains one of the countries in the world worst affected by the HIV/AIDS pandemic with a prevalence rate of 21.3 percent and women constituting 60 percent of those affected, a government minister said on Tuesday. Health and Child Welfare Minister, David Parirenyatwa, said this at the official launch of the "Man Enough to Care" document by Africare, a nongovernmental organization.
