

## Launch of WHO Global Study on Domestic Violence Against Women

---

The first-ever World Health Organization (WHO) study on domestic violence reveals that intimate partner violence is the most common form of violence in women's lives - much more so than assault or rape by strangers or acquaintances. The study reports on the enormous toll physical and sexual violence by husbands and partners has on the health and well-being of women around the world and the extent to which partner violence is still largely hidden. [Read more...](#)
